

## STATE OF NORTH CAROLINA FIRM PANEL LOCATOR DIAGRAM

### DATUM INFORMATION

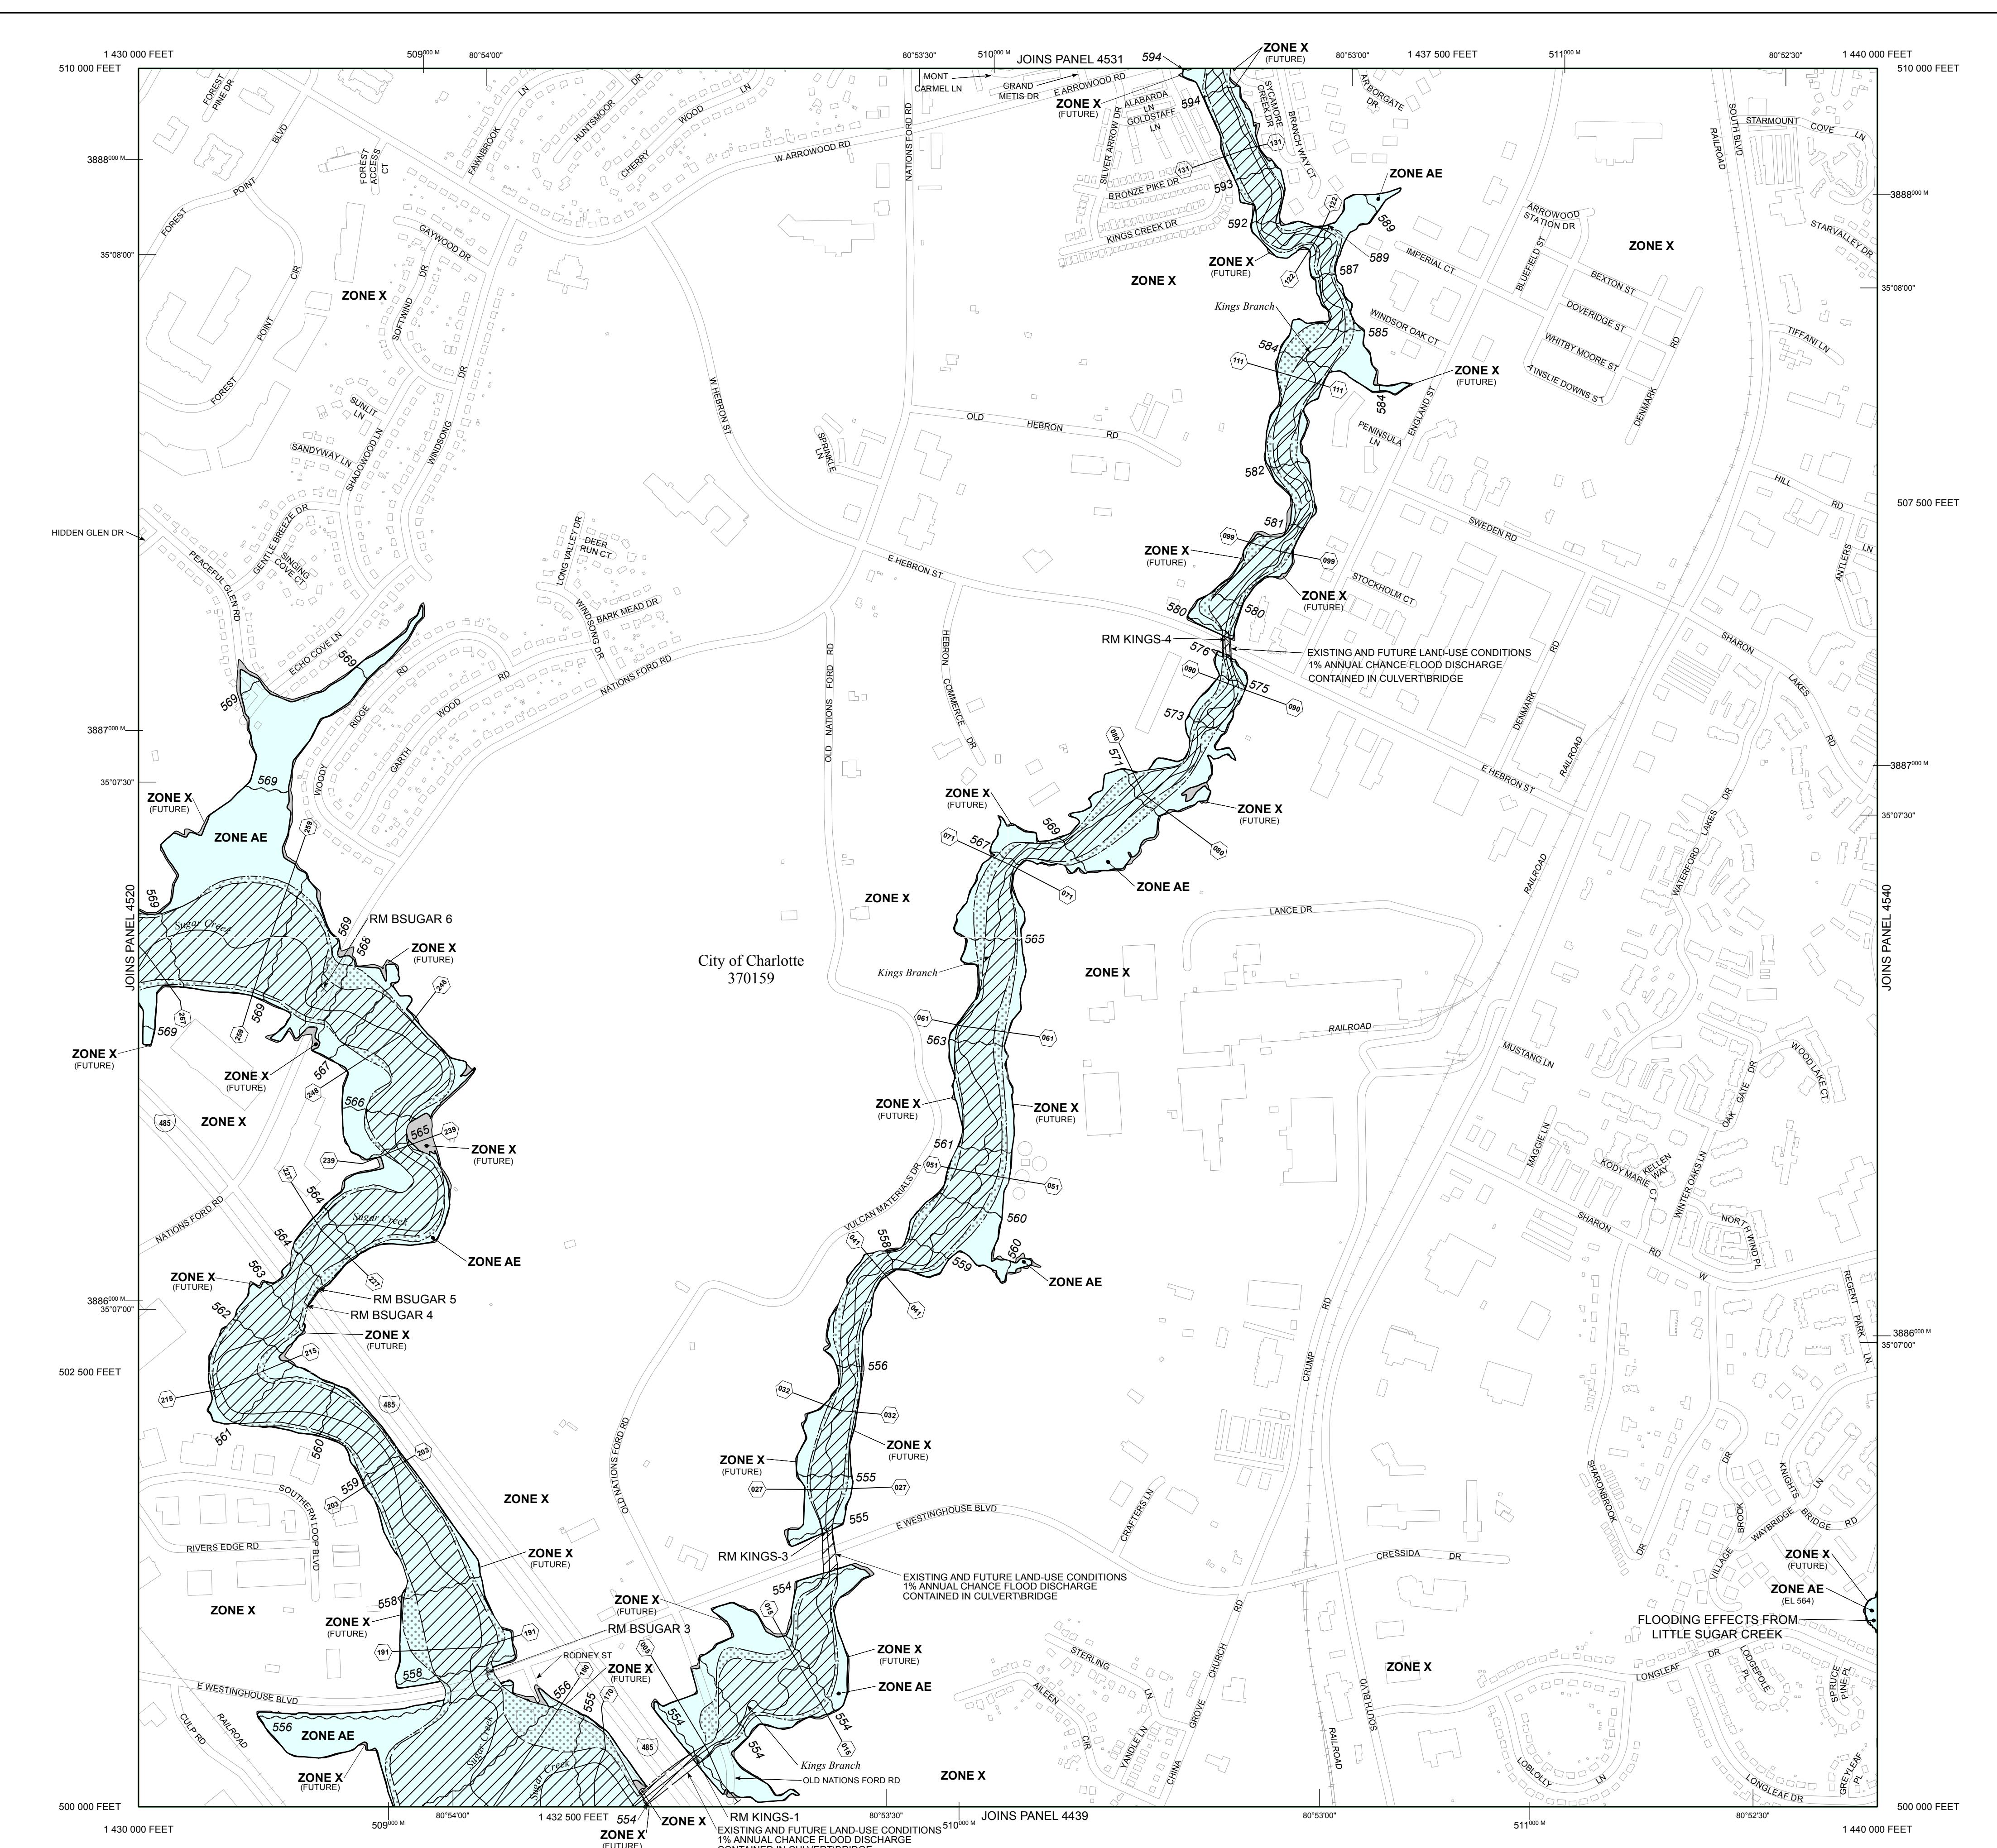

The projection used in the preparation of this map was the North Carolina State Plane (FIPSZONE 3200). The horizontal datum was the North American Datum of 1983, GRS80 ellipsoid. Differences in datum, ellipsoid, projection, or Universal Transverse Mercator zones used in the production of FIRMS for adjacent jurisdictions may result in slight positional differences in map features across jurisdictional boundaries. These differences do not affect the accuracy of this FIRM. All coordinates on this map are in U.S. Survey Feet, where 1 U.S. Survey Foot = 1200/3937 Meters.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988 (NAVD 88). These flood elevations must be compared to structure and ground surface reference to the same vertical datum. An average offset between NAVD 88 and National Geodetic Survey (NGVD 29) has been computed for each North Carolina county. This offset was then applied to the NGVD 29 flood elevations that were not revised during the creation of this statewide format FIRM. The offsets for each county shown on the FIRM panel are shown in the vertical datum offset table below. Where a county boundary and a flooding source with unrevised NGVD 29 flood elevations are coincident, an individual offset value will be calculated during the conversion of this statewide format FIRM. See Section 6.1 of the accompanying Flood Insurance Study report to obtain further information on the conversion of elevations between NAVD 88 and NGVD 29. To obtain current elevation, description, and/or location information for bench marks shown on this map, please contact the North Carolina Geodetic Survey at the address shown below. You may also contact the Information Services Branch of the National Geodetic Survey at 301-713-3242, or visit its website at <http://www.ngs.noaa.gov>.

North Carolina Geodetic Survey

<http://www.ngs.state.nc.us>  
Example: NAVD 88 = NGVD 29 + (-0.74)

All streams listed in the **Flood Hazard Data Table** below were studied by detailed methods using field survey. Other flood hazard data shown on this map may have been derived using either a coastal analysis or limited detailed Riverine analysis. More information on the flooding sources studied by these analyses is contained in the Flood Insurance Study report.

Cross Section	Stream Station	Easting Land Surface Conditions	Future Land Surface Conditions	Flood Hazard Data Table		Flood by Community Encroachment
				Distance from Center of Stream to	Water-Surface Elevation (ft NAVD)	
<i>1% Annual Chance (100-year)</i>						
005	535	2,941	3,200	554.1*	555.0*	36 / 25
015	1,500	2,941	3,200	554.1*	555.0*	245 / 65
020	2,050	2,941	3,200	555.5	556.5	110 / 122
032	3,150	2,941	3,200	555.4	556.0	20 / 75
041	4,100*	2,941	3,200	557.7	558.1	30 / 75
051	5,100*	2,889	3,140	560.5	560.8	100 / 120
060	6,100*	2,889	3,140	562.5	562.8	100 / 120
071	7,100*	2,889	3,140	566.6	567.1	20 / 104
080	8,000*	2,889	3,140	571.2	571.5	55 / 90
090	8,900*	2,889	3,140	574.5	574.9	32 / 32
100	9,800*	2,889	3,140	578.9	579.2	60 / 75
111	11,100*	2,874	3,127	583.5	584.1	20 / 145
122	12,200*	3,166	3,495	584.9	585.7	50 / 45
131	13,100*	3,166	3,495	593.2	593.7	30 / 125
140	14,000*	3,166	3,495	593.7	594.2	30 / 155
150	15,000*	3,166	3,495	594.2	594.7	30 / 155
160	17,000*	16,687	18,467	554.9	555.7	80 / 145
180	17,002*	16,687	18,467	555.6	556.4	445 / 576
191	19,052*	16,687	18,467	558.3	559.2	109 / 300
202	20,200*	16,687	18,467	558.6	559.5	50 / 154
213	21,250*	16,687	18,467	561.9	562.3	20 / 75
227	22,602*	16,687	18,467	563.9	564.9	220 / 46
239	23,652*	16,687	18,467	564.9	565.9	58 / 65
248	24,702*	16,687	18,467	565.8	567.8	64 / 104
259	25,752*	16,687	18,467	570.4	571.4	200 / 170
267	26,707*	16,687	18,467	569.3	570.6	298 / 178
Feet above confluence = ft Sugar Creek. *Feet above County line. Elevation includes backflow from Sugar Creek.						

### NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The **community map repository** should be consulted for possible updated or additional flood hazard information.

To obtain more detailed information in areas where **Base Flood Elevations** (BFEs) and/or **floodways** have been determined, users are encouraged to consult the Flood Profiles, Floodway Data, Limited Detailed Flood Hazard Data, and/or Summary of Stillwater Elevation Tables contained within the FIRM panel. It is important to note that BFEs shown in the FIRM represent round whole-foot elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIRM should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

Borders of **regulated floodways** shown on the FIRM for flooding sources studied by detailed methods were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the National Flood Insurance Program. Floodway widths and other pertinent floodway data for flooding sources studied by detailed methods are provided in the Flood Insurance Study (FIS) report for this jurisdiction. The FIS report also provides instructions for determining a floodway using non-encroachment widths for flooding sources studied by limited detailed methods.

This map reflects more detailed and up-to-date stream channel configurations than those shown on the previous FIRM for this jurisdiction. The floodplains and floodways that were transferred from the previous FIRM may have been adjusted to conform to these new stream channel configurations. As a result, the Flood Profiles and Floodway Data tables in the Flood Insurance Study report (which

certain areas not in Special Flood Hazard Areas may be protected by **flood control structures**. Refer to Section 4.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures in this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by **flood control structures**. Refer to Section 4.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures in this jurisdiction.

Please refer to the separately printed **Map Index** for an overview map of the county showing the layout of map panels, community map repository addresses, and a listing of communities table containing National Flood Insurance Program data for each community as well as a listing of the panels on which each community is located.

If you have questions about this map, or questions concerning the National Flood Insurance Program in general, please call 1-877-1-877 - FEMA MAP (1-877-336-2627) or visit the FEMA website at <http://www.fema.gov/business/nfip>.

An accompanying Flood Insurance Study report, Letter of Map Revision (LOMR) or Letter of Map Amendment (LOMA) revising portions of the FIRM may be available. Visit the [ncfloodmaps.com](http://www.ncfloodmaps.com) website or contact the **FEMA Map Information Exchange (FMIX)** at 1-877-FEMA MAP (1-877-336-2627) or its website at [http://www.floodmaps.fema.gov/fmix\\_main.html](http://www.floodmaps.fema.gov/fmix_main.html) for information on all related products associated with this FIRM.

For community map revision history prior to statewide mapping, refer to the Community Map History table located in the Flood Insurance Study report for this jurisdiction.

To determine if flood insurance is available in your community, contact your insurance agent, the North Carolina Division of Emergency Management or the National Flood Insurance Program at the following phone numbers or

NC Division of Emergency Management (919) 715-8000  
Charlotte-Mecklenburg Storm Water Services (704) 336-3734  
National Flood Insurance Program (1-800-638-6220)

**LEGEND**

SPECIAL FLOOD HAZARD AREAS (SFHAs) SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD
--

The 1% annual chance flood (100-year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The Special Flood Hazard Area is the area subject to flooding by the 1% annual chance flood. Areas of Special Flood Hazard include Zones A, AE, AH, AO, AR, V, and VE. The Base Flood Elevation is the water surface elevation of the 1% annual chance flood.

**ZONE A**  
No Base Flood Elevation determined.

**ZONE AE**  
Base Flood Elevation determined.

**ZONE AH**  
Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of alluvial fan flooding, velocities also determined.

**ZONE AO**  
Special Flood Hazard Area formerly protected from the 1% annual chance flood by a flood control system that was subsequently discontinued. Zone AO indicates that the former flood control system is being restored to provide protection from the 1% annual chance or greater flood.

**ZONE AR**  
Formerly a flood control system that was subsequently discontinued. Zone AR indicates that the former flood control system is being restored to provide protection from the 1% annual chance or greater flood.

**ZONE A99**  
Areas to be protected from 1% annual chance flood by a Federal flood protection system under construction; no Base Flood Elevation determined.

**ZONE VE**  
Coastal flood zone with velocity hazard (wave action); Base Flood Elevation determined.

**FLOODWAY AREAS IN ZONE AE**

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in flood heights.

**COMMUNITY ENCROACHMENT AREAS (Mecklenburg County)**

Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.

**OTHER FLOOD AREAS**

Areas of future conditions 1% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.

**OTHER AREAS**

Areas to be outside the 0.2% annual chance floodplain; areas outside future conditions 1% annual chance floodplain.

**ZONE X**

Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.

**ZONE X (FUTURE)**

Distance in feet from Center of Stream to Encroachment Boundary (Locating Dow reference).

**ZONE X (FUTURE)**

EXISTING AND FUTURE LAND-USE CONDITIONS 1% ANNUAL CHANCE FLOOD DISCHARGE CONTAINED IN CULVERT/BRIDGE

**ZONE X (FUTURE)**

EXISTING AND FUTURE LAND-USE CONDITIONS 1% ANNUAL CHANCE FLOOD DISCHARGE CONTAINED IN CULVERT/BRIDGE
